Steve,

I have looked through all the files from you that included the Las Vegas data. They include everything for the Ethoxylated compounds, and also the preparation information for the alkyl phenols and acrylamide.

But I don't see any analytical data for alkyl phenols and acrylamide. Sorry, but until I went through these in detail I didn't know what I had. This review is for all the files sent in the four emails.

I can write up my report on C15 EOx (Ethoxylated Alcohol C15) but need the analytical data for the other two analyses.

Please advise.

Thank you,

Dave
